- *Inflates Automatically*
- *Increases Visibility*
- *Easy to Install*
- *Easy to Maintain*
- *Custom Sizes Available*
- *Made in America*

VZ Environmental introduced **VSoxz™** to minimize and contain airborne dust particles released from open hatches on sand proppant storage equipment (Sand King, Sandflyers, Mountain Movers, Frac Sanders) . **VSoxz™** are a custom designed filter which allow high positive pressure air to escape while trapping tiny dust particles that typically produce an unhealthy and unsightly sand cloud commonly occurring on frac sites.
